EC Regulation EC1907/2006 (REACH)

Date: 30.10.2020

Silcotec fully supports EC regulation EC1907/2006 (REACH) and is aware of its obligation to provide certain information to their customers.

Silcotec does not import or manufacture chemicals or prepare formulations of them, so therefore will not be part of the registration process. This company only supplies goods which are defined as 'articles' within the REACH regulations and do not contain substances intended to be released under normal or reasonable foreseeable conditions of use.

However, there is a legal requirement under REACH regulation article 33 that all recipients of articles shall be notified of the presence of Substances of Very High Concern (SVHC) in excess of 0.1% weight per weight (w/w) within the article.

As part of the overall REACH compliance plan, Silcotec are taking 4 main steps to ensuring accurate information is available. These are:

1. Measuring and analysis of all materials/assemblies to calculate "at risk" materials.
2. Direct contact with suppliers and manufacturers, including any statements received.
3. Monitoring of all advice documentation and specifications.
4. Subscription to specification databases (eg-BOMcheck).

As and when Silcotec Europe are informed that this limit has been exceeded, notification will be issued to the recipient of these articles. It will also state that disposal must be in accordance with the local, national and REACH regulations.
